I- Comprehension

10

- Read the text below and answer the questions.

In Saudi Arabia, there is not just one emergency number. 999 is the number people dial for the police. In case of fire, they dial 998 and for an ambulance the number is 997. Also, people who visit Saudi Arabia should keep in their minds that they need to carry the emergency number of their country's embassy for any problems regarding their visa or passport. In the USA, people call 911, when there is an emergency. The call is free from any telephone. The people who answer the calls are called "dispatchers" and they are trained to help the callers to stay calm.

In the UK, people dial 999 for an emergency. In fact, it was the first emergency number system ever used and it started in London on 30th June 1937. The telephone operator answers your call and connects you to the correct emergency service: fire, police or ambulance.

1. Why are the dispatchers trained in USA?

.....

2. In KSA, Is 998 the number for calling the police?

.....

3. Choose the correct answers:
